

# Usage Guidelines

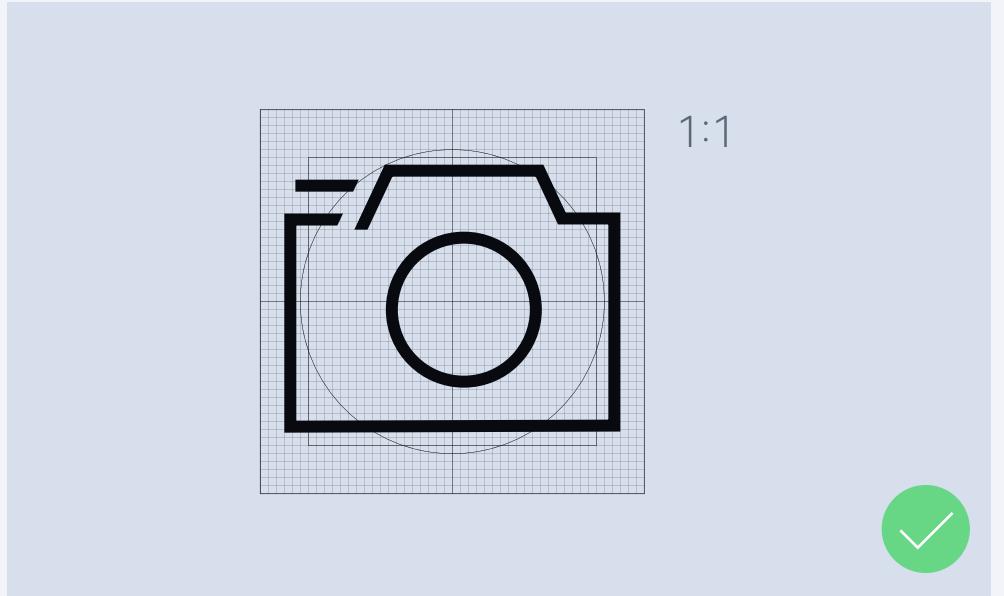

When creating icons, always adhere to the illustrated guidelines provided in the brand toolkit to preserve consistency across all applications.

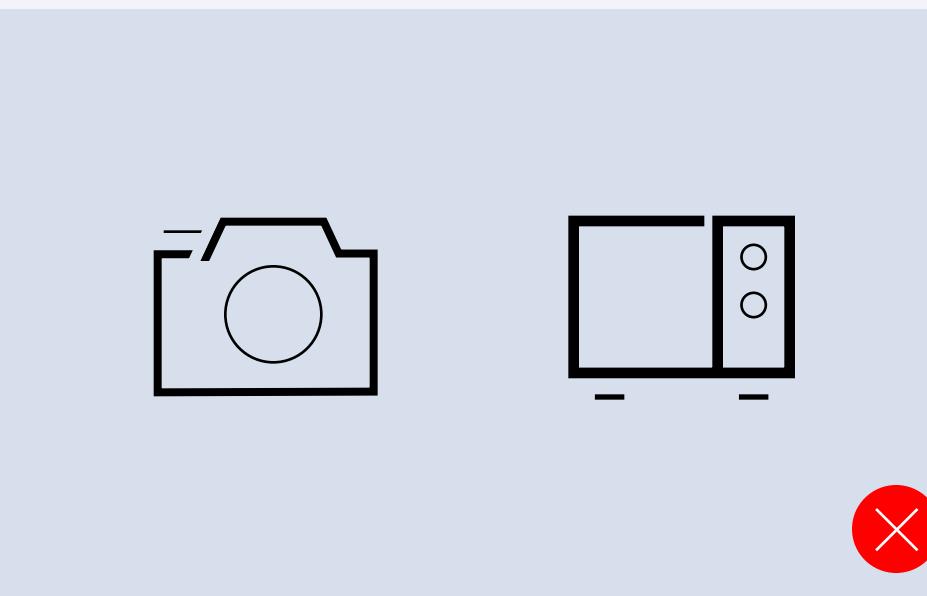

Icons of the same size must maintain consistent line weights and styles.

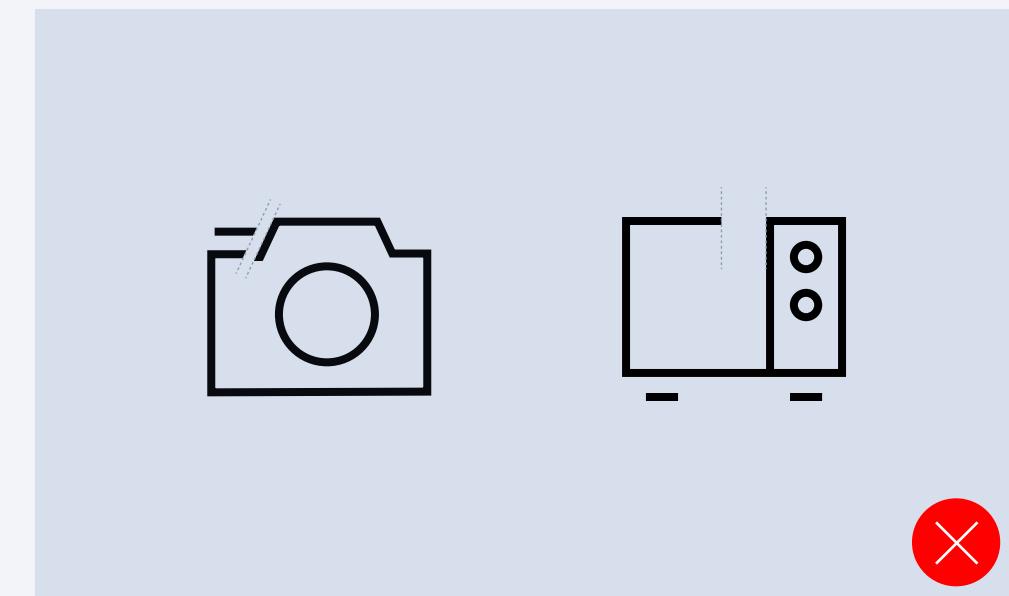

For icons of the same size, gap widths must appear visually consistent.

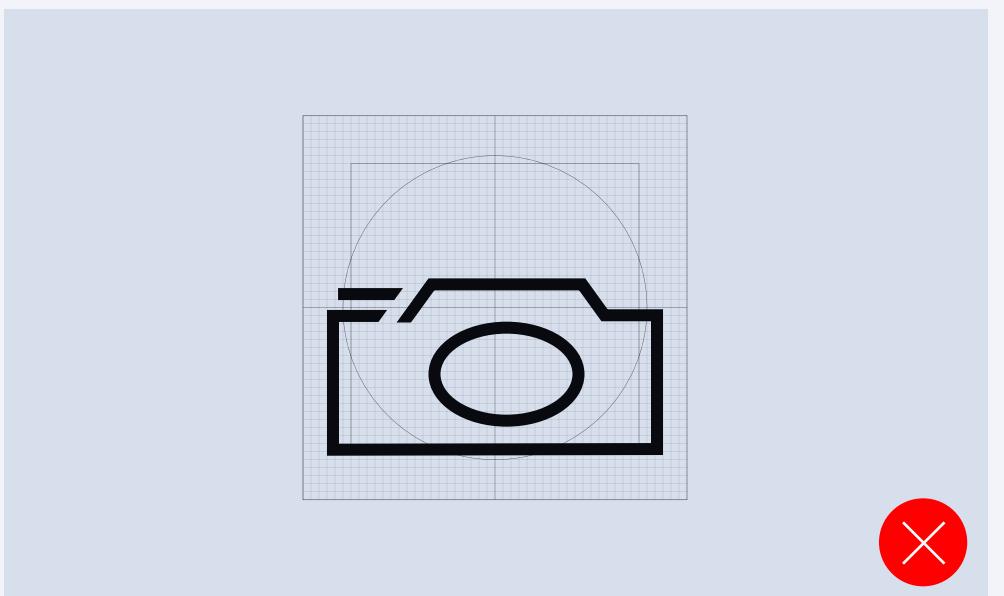

Icons should be created according to the standard proportions.

Do not use inconsistent line weights or styles for icons of the same size.

Avoid large differences in gap width for icons of the same size.

Do not stretch or compress icon proportions.
