

Brand Partnership Logo Combinations

When the brand logo and partner logo appear together, the vertical logo combination must be used. Other formats are not applicable for partner logo combinations.

A vertical line must separate the brand logo from the partner logo, with a spacing of x between the line and each logo. Please refer to the specification on the right for details.

The same rule applies when there are more than two partners.

Visual Balance

We aim to achieve a visually perfect presentation of the "Anker Innovations" brand logo alongside partner logos.

When presenting the logos together, consider the overall shape of each partner logo to achieve visual balance.

Design Specifications

X		1.5X	1.5X		X
X	 Anker Innovations	0.2X Visual balance illustration		Partner logos must be visually balanced in relation to the Anker logo. The combined logo height must not exceed the indicated area.	
X		1.5X	1.5X		X
