

## Auxiliary Pattern (Foundational Form)

The foundational auxiliary graphic is a triangle formed by the outer contour of the letter "A" in "Anker."

The triangle, regarded as the most stable geometric structure, symbolizes strength and efficiency in fields like construction and engineering—qualities that align closely with Anker Innovations' image as a reliable tech manufacturer.

Additionally, when these triangles are arranged in continuous, connected formations, they create a pattern called the "Spectral Grid," representing the brand's commitment to ongoing exploration and innovation.

The Auxiliary Pattern is extracted from the outer contour of the letter "A" in "Anker," forming a matrix.
