

Language Support

Mont for Anker

Mont for Anker supports most Latin-based languages. It does not support CJK (Simplified / Traditional Chinese, Japanese, Korean), Southeast Asian languages (e.g., Thai, Burmese), Arabic, Indic scripts and other non-Latin systems. For the full list of supported languages, please contact your designated font management designer.

HarmonyOS Sans

HarmonyOS Sans supports Simplified and Traditional Chinese and also covers five major global scripts: Latin, Cyrillic, Greek, Arabic and more—supporting a total of 105 languages worldwide.

Fallback Strategy

- If a headline contains a language that Mont for Anker does not support, use HarmonyOS Sans as a replacement.
- If neither font supports the language, consult your font management designer for assistance in selecting an alternative.
