

Social Media Avatar Guidelines

The logo should appear in vertical orientation when used in app icons, social media avatars, and similar touchpoints.

During application, the logo must remain clearly visible across various icon shapes—such as rectangle, rounded rectangle, and circle—while maintaining consistent size, margin, and visual balance.

Use a 32×32 grid with the logo center-aligned, occupying 24 grid units in width. Please refer to the specifications on the right for detailed proportions.

Regular Colors to Be Used

- Background Color: Black
- Logo: White
